

Dear Residents, we have 6 wild cherry trees available which can be planted around the Parish. We are looking for suggestions as to where these might go.

We would like the trees to be visible from the road so all will get the benefit as they grow. Trees can go on verges but must be at least a metre from the road edge and not below wires.

If we cannot find enough space in public land, we might plant in front gardens if in view of the road. Please message the Clerk if you can think of any good spots?
